

New Products

Driveline 98mm x 50mm Magnesium Hubs

The new 50mm magnesium hubs from Driveline offer a few new features over past design. The full round mounting surface provides a stiffer match between wheel and hub. The unique design works to free corner exit like a shorter hub without compromising rear end stability & consistency on turn in. The new hub is available in 98mm width for 50mm axles.

Driveline Angled Steering Hub

Anodized black, the Driveline angled steering hub tilts the top of the steering wheel back towards the driver offering more wrist comfort. Made from aluminum the Driveline hub is a cost effective piece to fit most European steering shafts.

\$32.95 Each

Driveline Sprocket Hub

Anodized black, the Driveline aluminum sprocket hub offers sprocket fixing on two sides. This design allows for better clearance against the axle bearing and cassette. The dual pinch bolt design allows for easier movement with a consistent bite when tightening. The Driveline sprocket hub is available in 30mm and 50mm sizes.
